

# Space Tourism Market: The Role of Governments

During its first century, aviation has grown from the Wright brothers' tiny "Flyer" to become a globe-spanning activity which has changed the world we live in. However, after more than 40 years, space travel remains very different from aviation: whereas air travel is a huge, privately operated activity – as it started, thanks to the Wright brothers – space travel remains a government monopoly activity, as it started, in the USSR back in 1961...
