

EXPERTS RECOMMEND BOOKING TRIPS TO EGYPT WELL IN ADVANCE

Egypt is expected to welcome many visitors in 2023, so travelers are advised to book their trips to Egypt in advance, as limited last-minute deals will be available this year.

Egypt has made it easier for travelers to enter the country by changing its visa policy, leading to a quicker recovery of its tourism industry. Despite the pandemic, Egypt was one of the first countries to reopen its borders to foreign visitors while taking appropriate hygiene measures. Additionally, it expanded the number of nationalities eligible for an electronic visa from 46 to 180. This simplifies the process of visiting the country for more people.

The country is taking several steps to increase tourism, including expanding flights and hotels, improving security in tourist areas, launching the most significant archaeological museum globally, and issuing a five-year multiple-entry visa.

Egypt has now fully recovered from the coronavirus pandemic. According to the Egyptian government, the country received 43% more visitors in the first quarter of 2023 than in 2022. Experts estimate that this growth to continue.
